PROJECTS

Wireless AC Power Detector| PULSE AND DIGITAL CIRCUITS
Right from the day of advent of commericial distribution of electricity till today we have many live wires carrying AC current will do harm or even lead to illing of people.This project has the capability to sense a flow of alternating current around its vicinity without even having a physical contact with the livewire.

MINI AUDIO TRANSMITTER| ANALOG COMMUNICATIONS
It uses "frequency Modulation",most commonly known as "FM",this project works on the very same principal to transmit audio signals captured by the microphone.This circuit uses BC547 transistor to amplify the signal and then frequency modulate it.
